

MULTI-RETICLE ADJUSTMENTS

To change the reticle, press the UP  button for 3 seconds. You will have to stop pressing the button and re-press in order to cycle to the next reticle option.

MULTI-RETICLE SUBTENSIONS

The multi-reticle variant provides 4 reticle options, including a 2 MOA center dot.

At 50 yards, a 2 MOA dot is 1"

At 100 yards, a 2 MOA dot is 2".

When changing between reticle options, your subtensions will not change. This allows for reliability and versatility across firearm platforms.
